Final Modification Report No. 1

Changes for alignment
with the other NI TSO Codes

5th August 2016

West Transmission Ltd (WTL) has prepared this report under section 8 of its Transmission Code Modification Rules.

A Description of the nature and purpose of the modification

This proposal is being made to align the WTL Code with the Codes of the other NI TSO Codes, following their amendment to incorporate references to the WTL Code and for ‘housekeeping’ changes following modifications for the implementation of EU legislation and certain other changes.

B Third Party Representations

No third party representations were received in response to this Proposed Code Modification.

C Changes relative to the Initial Modification Report

WTL has made one additional change at 17.2.2 (f), where reference to the BGTL code and the GNI (UK) Code has been included to better reflect the requirement in 17.1.3.

D WTL’s Recommendation

WTL believes that the Relevant Objective, (condition 2.4 of the WTL Licence) will be better facilitated by the Licensee’s Network Code as a result of this modification. This set of changes will contribute to the secure, safe, reliable, efficient and economic development and maintenance of the Network by aligning the WTL Code with the Codes of the other TSOs and addressing typographical and minor drafting inconsistencies.

E The clauses of the Transportation Code that require amendment

This proposal includes changes to all the sections of Code. Please see the attached final legal text for details.

F Impact on other Designated Pipeline Operator’s Network Codes:

WTL has worked with PTL, BGTL and GNI (UK) to develop a co-ordinated approach to the Codes. All the other NI TSOs are submitting a corresponding Modification Proposal which closely mirrors the changes contained in this Code Modification Proposal for the WTL Transmission Code.

G The date proposed for implementation

WTL suggests that the proposed modification is implemented with effect from 1st September 2016

H Final Legal Text

Please find the final legal text for this Code Modification Proposal below, marked up to show changes in track.
