**Re: OS Scheme and CMP Methodology Statement**

Thank you for your recent joint TSO submission of the 'OS Scheme and CMP Methodology Statement' as required by condition 2A 2.1.18 of your licence.

The Utility Regulator has considered the response received to the consultation carried out by the TSOs and reviewed the proposed changes to the scheme in line with the requirements in Regulation (EC) No 715/2009 Annex 1 2.2.2 relating to Congestion Management Procedures (CMP).

**Decision**

Accordingly, the Utility Regulator approves the Scheme submitted to NIAUR on 11 August 2016.

You should note that we will continue to monitor the use of over subscription capacity by network users and in future we may use the relevant powers to make changes to the Scheme consistent with our statutory duties as we believe appropriate.

Yours sincerely,

Tanya Hedley

Director, Compliance and Network Operations
