

Job Title: Project Development Engineer

Location: Belfast

Reason for the Role: This is an expansion role.

Background: A new role in a key strategic area for the business, you will be developing and delivering pathfinder and large-scale energy infrastructure projects critical to delivery of the NI energy transition. You will be working with NI government, the Utility Regulator and other key energy industry partners and stakeholders to deliver critical projects, while minimising costs for NI energy consumers.

Purpose of the Role: You will drive the technical development of energy transition projects to help bring them through to FID. While mainly technical, you will need some understanding of energy sector commercials. You will work across multiple projects simultaneously and across both the electricity and gas sectors.

Key Responsibilities

- Project manage development projects across various stages from initial concept to FID.
- Manage the development of energy transition projects through key milestones including land rights, network connections, planning and environmental consents and other permitting requirements.
- Engineering support for development projects– manage project technical areas and assess technical project risks.
- Interpret, understand, and keep up to date with relevant technical standards, industry guidelines and health and safety requirements
- Perform technical due diligence on energy transition projects
- Manage external technical consultancy support for development projects
- Provide technical advice / appraisals to NI government departments, the Utility Regulator and other project stakeholders
- Budget management.

Essential Criteria

1. Third level qualification in an engineering, or other relevant technical discipline.
2. Direct experience of working in a technical role within the utilities industry or a large infrastructure project in another sector.
3. Ability to apply sound engineering judgement and to identify, assess and manage technical risk.
4. Able to assess complex technical information, reports, and critical analysis and present robust recommendations to senior management.
5. Experience of scoping and managing external technical consultancy services. Alternatively, experience of working as a consultant.
6. Evidence of managing and delivering complex projects or programmes of work, across multiple stakeholders, on time and to budget.
7. Driving licence
8. Right to work

Key Competencies: Project Management / Technical / Critical & Strategic Thinking/ Management and Leadership Skills / Communication Skills / Team Working / Organising & Planning / Personal Effectiveness

Benefits

Office Location: The Arena Building, Ormeau Road, Belfast with on-site carparking.

Remuneration: Competitive Salary

Bonus: A 10% bonus based on company and individual performance will come with this role.

Pension: Contributory pension matched up to 9.5% by the employer.

Private Medical: Private medical insurance

Life assurance: Life assurance is available with this role.

Critical Illness: Critical illness cover is provided with this position.

Hours of Work: The standard hours of work are 9am - 5pm although a higher degree of commitment and flexibility may be required to meet deadlines.

Hybrid Working: The company offers non-contractual hybrid working arrangements, with a minimum of two working days per week within the office, subject to particular work requirements. Staff are expected to be flexible – e.g. if 'face to face' meetings require their presence in the office more frequently.

Annual Leave: 25 days annual leave plus 11 statutory days.

Notice Period: up to 3 months by either side.

Probation Period: 6 months.

Travel: A degree of travel across the UK, Ireland and Europe can be expected with this role.

Closing date for applications via CV is 3rd February 2023.
